

**Time Moves Differently in Heaven**  
**By Joshua Garcia**

The hands on a clock circle its face like the planets circling the Sun  
Even the heavenly bodies are made to move in sync with the sands of an hourglass until it is done  
The breath one breathes is subject to time because sometimes you have to catch your breath  
Obsessed with control we try to manage it and put it into our own hands causing stress  
Jotting down hours and dates to meet with loved one's next week or month  
Who are we to bet on what will come after our head hits the pillow like the beat of a drum  
Eyes closed, breaths calmed, we only awake to a new day because God gives us time  
He invented time itself before he said let there be light, and the Sun shown bright  
Never amount, just account for the water that comes from the eternal fount  
The gift gives to peasants to make the life more relevant for existence  
With no regrets He makes mole hills out of mountains  
Like turning kites into satellite parasites that feed off the never-ending light  
Chasing death to its end so more tilling against the diabolical villain  
Digging up treasures that are unique and intimate to the Christian  
Because time is on God's side, whether 100 years or 100 years times 9  
Nonetheless, this church building is subject to seconds, minutes, and hours  
What was once the founders of this congregation has now become ours  
Even though this building itself was built with lumber and stone  
Jesus Christ was, is, and always will be seated on heaven's throne

**And all God's people said: "Amen".**
